WHITEPAPER

Now tourism is in the blockchain

CONTENTS

1. WHAT IS WALLETOURS?

WALLETOURS (WTS) is a decentralized cryptocurrency created and directed to the whole community of tourists, who make different trips throughout the world with an end needs from one place to another. Today tourism is one of the most important industries worldwide and promotes trips of all kinds: for rest, cultural, social purposes interest, business or just leisure.

2. ABOUT US

We are a team that loves technology and tourism and we are passionate about its natural beauty geologically known; until today, to know new places, to experience different cultures, to enjoy wonderful landscapes and with the possibility of sharing with friends, family and more, that daily life does not always allow it. From this perspective, we understand that we support tourism animation by implementing blockchain technology.

3. OBJETIVE

Our goal is to bring the blockchain technology to an innumerable number of tourists around the world for a connection with ancestral origins. We incorporate an innovative technology for your pleasant trip, a new way for your digital assets. Walletours (wts) allows P2P payments

on an equal basis, immediate transactions, low cost commissions, improve the obstacles and problems that we lack today in the purchase and sale of tickets. It will be possible a change with one of the latest technologies based on a public network in the chain of blocks (blockchain).

4. TYPES OF TOURISM

4.1. Sun and beach tourism

It is the maximum expression of mass tourism, since the beaches in the different tourist destinations are the most visited by tourists. It consists primarily of spending a few days of leisure in a coastal destination, naturally with beach and sea, which must have public spaces for this activity. The most common is that tourists stay in luxury hotels and purchase "all-inclusive" packages that allow them to have the least possible worries.

4.2. Health tourism

It includes medical tourism and wellness tourism. It is a phenomenon that takes place when people travel to seek treatments that allow them to improve their living conditions, these can be doctors who perform some type of surgery,

rehabilitation clinics or spaces to help their health. Some of the reasons for this type of travel is because of the quality or the economics of the services outside of your place of residence.

4.3. Cultural tourism

Within cultural tourism, the best known are religious tourism and gastronomy. This is more demanding and has the possibility of developing at any time of the year; it is traveled with the intention "to learn something", since it is normally done by people with a higher than average educational level. It is common to look for historical monuments of the visited destination, the most representative gastronomic manifestations of the place and events or legends that tell the history of it.

4.4. Sports tourism

The definition of strict sports tourism refers to the number of people participating in a series of competitive sporting events. Normally this type of events attract many visitors who want to see the events, such as the Olympic Games, the World Cup, every 4 years, Formula 1 and regional events, there are several classifications on sports tourism.

4.4. More types of Tourism
